PROFILE

A passionate and young aspiring IT professional with an innate ability to adapt to new technologies and with an entrepreneurial mindset. An experienced leader and a team player, who is able to provide simple solutions to complex problems through creativity and innovation and Full-stack developer | ML Enthusiast

EDUCATION

BSc Hons (Computer Science) - University of Jaffna

Jun 2019 - Now

CGPA: 3.1/4.0

BCS, The Chartered Institute for IT- British Computer Society

Mar 2018 - Now

G.C.E Advanced Level - AL Azhar National School

Mar 2014 - Aug 2017

Physical Science Stream

Results:

Combined Math - A

Physics - B

Chemistry - S

EXPERIENCE

uPraxis Group | Front-End Developer

Oct 2022 - Present

- I was a part of the JustPayroll and CIS Buddy team.
- JustPayroll is easy and TRAIN-compliant payroll system and timekeeping devices made with real solutions for the Philippines
- Technology stack: **AngularJs, NextJs, TypeScript, Docker, GCP**

Azend Technologies | Software Engineer Intern

Now 2021 - May 2022

- I was a part of the Careers360 team. Careers360 is a professional networking and career development platform.
- I mostly worked on the front-end features of Careers360.
- Technology stack: **Typescript, Nextjs, Nodejs, AWS**

Tafato | Software Engineer Intern

Jul2021 - Sep 2021

- I was part of the No-Agent team
- No-Agent is a Pakistan's only NoCommission property site
- I have worked with AWS Cognito, Amplify Studio, S3 bucket, Lambda Function, ReactJS and NodeJS
- Technology stack: **Typescript, ReactJS, NodeJS, AWS**

SELECTED PROJECTS

Intelligent Invoice Documentation | Research Project

- Intelligent invoice documentation refers to the use of artificial intelligence (AI) and machine learning techniques to automate and streamline the process of creating, managing, and analyzing invoices
- Tech using: **PyTorch, NLP, MLM and Scikit-Learn**

Diabetes Predict | Research Project

- predict whether a patient has diabetes
- Tech used: **Python, Pandas and Scikit-Learn (KNN, Decision-Tree, SVM)**

Auto Predict

- Auto Predict is a mobile application which predicts the current market value of a second hand vehicle by using different kinds of machine learning techniques such as KNN and Random Forest regression.
- Tech used: **Python, Pandas and Scikit-Learn**

BMarket | Web Application

- construction companies manage their resources and streamline their ordering process. It can enable businesses to track inventory, monitor sales, and automate the ordering process.
- Tech used: **NextJs, NodeJs, TypeScript, MongoDB, AWS**

Online Store I Web Application for Buyers

- Our application provides an e-commerce platform for users to purchase products and arrange for delivery. Customers have the ability to select delivery options during the checkout process
- Tech used: **Laravel, MySQL, Heroku**

SKILLS

Computer Skills

Python, Java, HTML5, CSS, Less, ReactJS, NodeJS, JavaScript, Bootstrap 5, Laravel, AWS, MongoDB, DynamoDB, MySQL, Jira, GitHub, Git, Figma, Docker, Cloud Run

ACHIEVEMENTS

IEEEExtreme 14.0

- Organized IEEE - 2020
- Ranked 45th in All Island and 495th out 7300 participants worldwide

Runner Up I Hackforce

- Among 50+ teams islandWide

Google Hash Code

- Organized google - 2021
- Place first in University

VOLUNTEER WORK

ComSoc Community Secretary I University of Jaffna

Sep 2021 - Oct 2022

- Secretary of Computer Society University of Jaffna.
- Organized several technical workshops

Editor of Muslim Majlis I University of Jaffna

Mar2021 - Mar 2022

- I create compelling flyers, videos, and social media content

Member of IEEE Student Branch I University of Jaffna

Oct 2019 - Present
